

“WOW!

Smart Company Inc is much bigger and does much more than I realised!”

titanclass
VISION

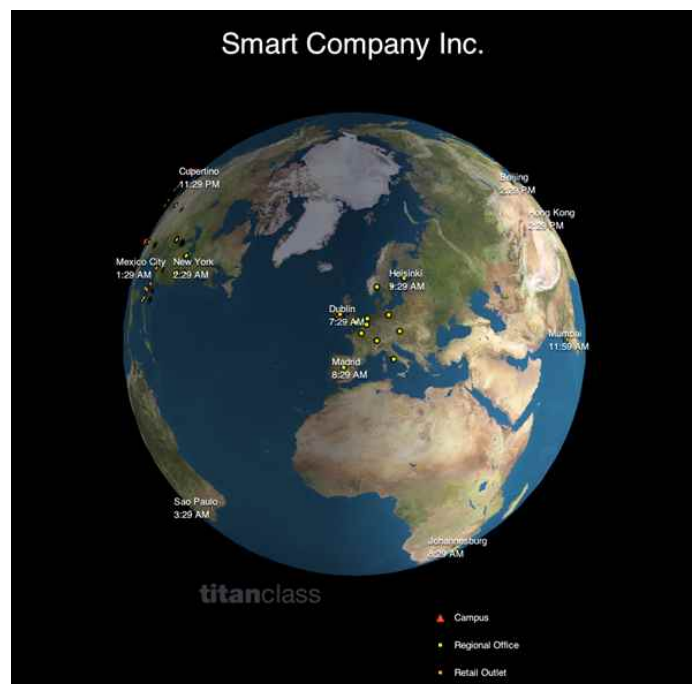

Smart Company Inc.

The Power of Global Vision for the Corporate World

The majority of your potential and existing clients have no real idea of your organisation's operations. That also goes for your employees, suppliers, public and various stakeholders. Corporate brand awareness is one of the primary keys to profit. Terms such as, ***"I did not realise you did that"***, ***"If only I had known"***, ***"I did not know that you were in so many places"*** and ***"I did not realise that I work for an organisation that did so many things or was in so many countries"*** can cost millions of dollars in lost revenue every year.

Titan Class Vision helps address the above issues at a fraction of the cost of traditional methods.

Switch between 2D and 3D with high definition zoom capabilities

Customised Technology for Boardroom, Reception and Common Areas

Titan Class Vision displays an enterprise's unique global presence and brand across stunning satellite imagery. Vision will impress and captivate audiences in boardroom, reception and common areas.

Titan Class Vision is designed to be customised to your specific needs. It comes to you displaying your company logo, world wide office locations and world time. However it can be further tailored according to your company's specifications. In the boardroom it can be used in meetings to show agendas. At the reception desk it can communicate company news, world wide weather or zoom in to show greater local detail. At the airport Vision can be used to show flight paths and facilitate advertising. The opportunities are huge.

VISION

Proven Core Technology

US based Palm Inc. licensed the Titan Class Palm OS applications for 5 years. The outstanding success in the Palm consumer economy saw over 80,000 applications sold. Based on this success Titan Class has now been developed for the global enterprise market and taken to the big screen.

Titan Class products were used in the worldwide launches of the new Tungsten T Palm Handheld by Palm Inc. and with the Palm Operating System 5 by PalmSource.

Titan Class Vision builds on 10 years of core technology, international award-winning designs and acclaimed customer service.

Communicate your organisation's national or international information intuitively and rapidly

Get Vision

Pricing for Titan Class Vision to integrate with your existing display technology starts at AU\$24,995 plus GST. This price includes:

- your company logo, world-wide office locations and several world time locations over beautiful satellite imagery;
- a readily concealable, quiet and portable miniature computer;
- the computer being configured as a turnkey solution that provides automatic start-up and shutdown; and
- the first year of support and maintenance.

We can also source display technology and offer further customisation at a competitive price. Installation is a one-time fee and quoted on a site specific basis.

Talk to our professional team today to discuss the great opportunities Titan Class Vision can offer your organisation.

Titan Class Vision uses the world's most advanced technologies including a miniature computer in an anodised case the size of 5 CD boxes stacked high
